OBJECTIVE

Experienced Technical Writer and Developer Relations professional with nearly a decade of experience across open-source, cybersecurity, and the web3 ecosystem. Proven success in building and scaling documentation infrastructure, developing user-centric content strategies, and driving developer engagement through clear and concise communication. Adept at translating complex technical systems into accessible resources that empower both developers and broader audiences. Skilled in fostering community collaboration, supporting external contributors, and leading cross-functional teams. Passionate about privacy tech, decentralization, and building inclusive, developer-first ecosystems through high-impact content and advocacy.

CORE COMPETENCIES

Technical Communication:

API / SDK documentation · CI/CD & DevOps pipelines · Developer onboarding flows · User outreach · Feedback loops

Domains:

Web3 · Privacy protocols · Cybersecurity · Open-source software standards · AI / LLMs

Strategy & Leadership:

Documentation architecture · Knowledge base design · Cross-team coordination · Project management

Infrastructure & Tools:

Documentation platforms (Docusaurus, RTD, VuePress) · Git · Markdown · HTML/CSS · Containers · UNIX systems · Mixnets · CMS

Supplementary:

SEO & content optimization · Brand voice consistency · Developer relations support

WORK HISTORY

LEAD TECHNICAL WRITER 05/2022 to Current

Peithos Technical Writing, Montreal, QC

- Founder and lead of a technical writing firm specialized in web3-related projects.
- Served and managed clients performing on-demand and retainer based services for documentation portal deployments and maintenance.
- Implemented and deployed user feedback loops and support pathways, including AI integrations for FAQ bots and automatic indexing of in-channel inquiries.
- Worked with a wide diversity of projects across the Eth2, Cosmos, and broader web3 ecosystem.

SR. TECHNICAL CONTENT STRATEGIST 10/2022 to 05/2023

Parity Technologies

- Wrote and maintained internal documentation and academy coursework related to Polkadot and Substrate.
- Turned 200 hours of live presentations and documentation into a comprehensive manual spanning 100+ pages, still used for internal training and education to this day.
- Created modular content architecture and course materials for developer onboarding and certification.

- Partnered with engineering leads to align documentation strategy with evolving SDK releases.

SENIOR TECHNICAL WRITER 11/2021 to 02/2022

Matter Labs

- Rebuilt project-wide documentation strategy and review workflow for zkSync's developer ecosystem.
- Led documentation audit identifying redundancies and security inaccuracies across 40+ guides.
- Enhanced information architecture for improved developer discoverability.

LEAD TECHNICAL WRITER 09/2018 to 06/2021

Prysmatic Labs

- Authored and maintained the original Prysm Ethereum 2.0 client documentation.
- Wrote over 25,000 words of technical content, helping springboard Prysm into an over 80% client dominance in the years following Eth2's deployment.
- Curated community contributions and developed user feedback structures to maintain documentation robustness and relevancy.

TECHNICAL WRITER 05/2020 to 08/2020

Protocol Labs

- Worked on the Filecoin project's new Technical Writing team.
- Collaborated with engineering teams to gather requirements and clarify technical details.
- Developed comprehensive documentation for technical concepts and user guides.
- Conducted content reviews to ensure accuracy, clarity, and adherence to standards.

FOUNDER 05/2017 to 06/2020

MAGENPROD, Inc., Montreal, QC

- Founded and launched an international media production company based out of Montreal.
- Developed business model and subsequent online storefronts, coordinated in-house development of custom software (CMS, payment portals).
- Cultivated pre-launch organic following totaling over 20,000. Received articles and interviews in several major publications. Manage 2 developers and a producer in the US and produced content locally.
- Sold business in 2020.

PENETRATION TESTER 06/2016 to 12/2019

MintSec LLC

- Freelance contracted penetration testing, compliance standards testing, redteam participation, as well as applied cryptography consultations and assessments.
- Worked on a variety of projects, from corporate networks to IoT healthcare devices.
- Developed and executed tailored testing strategies for diverse environments.
- Led incident response efforts, coordinating with stakeholders during security breaches.

TECHNICAL WRITER 08/2018 to 05/2019

Enigma MPC

- Authored and maintained the original Enigma MPC documentation and specification, with over 30,000 words written.
- Managed the project-wide technical content strategy and implemented support flows to incorporate user feedback efficiently.
- Led initiatives to streamline documentation workflows and improve team productivity.
- Conducted thorough document reviews to identify inaccuracies, inconsistencies, or areas needing clarification.

TECHNICAL WRITING INTERN 03/2018 to 08/2018

The Tor Project

- Selected from over 40 participants for a technical writing internship focused on writing and updating various Tor-related guides as well as maintaining the manual.
- Completed over 140 contributions, including 20+ fully rewritten guides.
